Weekly Coal Production

Energy Information Administration
Washington, D C

Production for Week Ended:
March 22, 1986

Highlights

U.S. coal production in the week ended March 22, 1986, as estimated by the Energy Information Administration, totaled 17.70 million short tons (bituminous coal and lignite, 17.62 million short tons; Pennsylvania anthracite, .07 million short tons). This was 2.4 percent lower than the previous week, and was 6.2 percent lower than production in the corresponding week of 1985.

Cumulative U.S. coal production from January 1 through March 22, 1986, was estimated at 198.48 million tons, 1.7 percent above the 195.24 million short tons produced in the comparable period in 1985.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).
